

Questions to Ask a Fertility Specialist

What testing do you recommend? Can you explain them to me?

How long will it likely take to get a full fertility workup done and a diagnosis?

Is there a waitlist to start treatment? If so, how long will it take to start treatment?

Are there certain lifestyle changes you recommend to optimize our chances of getting pregnant?

What types of treatments and options (add-ons) does your clinic offer?

How many fertility doctors are on your team, and will I be seeing all or one throughout my time here?

What are your thoughts on alternative medicine?

How much do your treatments cost and any add-ons?

Do you sell medications directly? Can I get a cost breakdown?

Do you take insurance? How much will my insurance cover?

Do you offer financial options for treatments? Will an IVF coordinator walk me through the costs?

What are your success rates (for age categories too)?

What are our next steps?

What is the time commitment (do I need to book time off or rearrange schedules)?

Who is the best person to contact if I have any questions and are they available after hours/weekends?
